

RESOLUTION NO. 9-1

WHEREAS, on April 8, 2015 the Sangamon County Board approved the execution of a contract between Sangamon County and Security Automated Systems Inc. for the maintenance and upgrade of the Security Automated Systems Inc. for the Sangamon County Jail and Courts Complex;

WHEREAS, The Security Electronic touch screen upgrade has encountered an oversight of the Telecor audio communication system equipment. This oversight was not detected until the programming of the new electronic upgrade system.

WHEREAS, the audio communication is a vital necessity for officers and staff to communicate and allow entry in and out of areas in the jail.

WHEREAS, it was discovered that the hardware is outdated (15 + years old) and has key components that are obsolete. The system also has a firmware that is no longer used or will interface with the newer systems we are updating. The age of the Telecor audio communications system, lack of replacement parts and obsolete parts will cause a very unstable system.

WHEREAS, this is a strong officer security safety situation that should be addressed and resolved to provide a stable audio communication in the jail.

WHEREAS, Security Automated Systems will furnish and install the necessary labor, materials, tools and supervision to perform the following work to integrate and replace the outdated audio communication equipment located in the jail at the Sangamon County Jail.

In addition to be supported by the manufacturer, a new audio communications system will provide a stable system interfacing with the new updated security electronic operational systems.

The new audio communication equipment is necessary and also provides stable security measures, because many Telecor parts are obsolete, the performance and reliability of the system will be improved, safe and stable for corrections staff.

The audio communication equipment will interface with the new equipment and interface directly to the PLC system.

BE IT RESOLVED that the Sangamon County Board in session on the 8th day of September, 2015 authorizes the replacement of the audio communication system, on an emergency basis, and the execution of a contract between Sangamon County and Security Automated Systems a copy of which proposal is attached hereto and marked "Exhibit A:
